

IMAGINE IF

Emergency Care Conference
19th - 20th October 2023 | Manchester

Conference Outline

Building on the community of last year's conference, you're invited to join your Emergency Care friends for two days of shared learning, connection and fun at Worsley Park Country Club, Manchester.

We all need time out and space to reflect and process, and often that's easiest with people who do what you do and get what you're experiencing. This conference is that place and those people.

In this celebration of emergency care, we'll hear how ideas have become reality, we'll share our collective wisdom and see how our imagination shapes the future of emergency care.

You can expect a mix of great clinical, leadership, and wellbeing talks, 'Imagine if' conversations, and smaller workshops, as well as a chance to hang out and have some fun with your emergency care mates.

The conference is hosted by Lynda Holt and Brian Dolan OBE, and the speakers are an eclectic group of well known faces and people quietly changing their bit of the world.
